

Martech Record | Privacy & Compliance In An Era of First Party Data

On April 19, Davis+Gilbert Privacy + Data Security partner Gary Kibel, Skimlinks Chief Architect Radek Masciaszek and privacy start up co-founder Alex Cone will help illustrate how now is a good time to make informed decision despite a lack of clarity on the future of regulation in a webinar hosted by Martech Record.

Session Overview

This webinar will explore the current regulatory environment, speculate on future regulation and then ask the question: is compliance simply a cost center, or can your organization take a strategic approach to coming regulation?
